Genetics is the study of heredity, that is, how characteristics such as eye colour are inherited from parents to offspring.; Genes are the chemicals in the nuclei of cells that determine the characteristics that are inherited. Each human cell has thousands of genes in the nucleus. Genes are made of DNA (deoxyribonucleic acid). ...

Introduction to Genetics - Biology Is Fun

Genetics is the study of genes, and tries to explain what they are and how they work. Genes are how living organisms inherit features or traits from their ancestors; for example, children usually look like their parents because they have inherited their parents' genes. Genetics tries to identify which traits are inherited, and explain how these traits are passed from generation to generation.

Introduction to genetics - Wikipedia
