Inflight Science: A Guide to the World from Your Airplane ...

Inflight Science gives a brief tour of some major science concepts set loosely around the fact that you're supposed to read it on a plane. There are miniature "experiments" to carry out whilst airborne (e.g. throwing a ball of paper in the air and noting that it doesn't fly to the back of the plane).

A Teacher's Guide to the Science of Flight

Flight Study Guide (Science 6) Organizing things that fly: ! Floaters could include items such as balloons, dandelion seeds, parachutes, poplar fluff or bubbles. Technically, a floater does not really fly. The wind controls the speed and direction of flight. Examples of floaters: ! Paper airplanes, flying squirrels or hang gliders would be ...

Flight Study Guide (Science 6) - cpb-ca-c1.wpmucdn.com

For thousands of years, people have wanted to fly. Our legends and fairy tales are full of humans and animals that can fly - effortlessly gliding through the air. In real life, of course, no one can just fly into the air. We don't have wings and a power source strong enough to keep the wings moving through the air to sustain the lift necessary for flight.
