Airbus A320 family - Wikipedia

Takeoff Performance Chart Description • Chart Heading – The chart heading specifies the performance criteria that were used in the Runway Analysis. Items included are Aircraft Type, Engine Type, Airplane Flight Manual Revision Number, Flap Setting, Airport IATA/ICAO identifier, Airport Name, Airport City/State/Territory, Airport

Takeoff Performance Chart Description

Yeah, there are an enormous amount of variables to takeoff distance. Aircraft weight, engine choice, field elevation, temperature, humidity, runway slope, runway condition, etc. I assume you're looking for the usual, standard day, maximum takeoff weight, sea level, level dry runway. If I get some numbers, I'll post them.

Required Runway Length.... - Airliners.net

runway length is “the longest resulting length after any adjustments for all the critical design aircraft under evaluation.” Although Part 121 charter operators require the longest runway lengths of the three key user groups at PUW, these lengths are not justified because operations by the Airbus A319 and the Boeing 737-800 do
