A related factor is the specific gas constant or individual gas constant. This may be indicated by R or R_{gas} . It is the universal gas constant divided by the molar mass (M) of a pure gas or mixture. This constant is specific to the particular gas or mixture (hence its name), while the universal gas constant is the same for an ideal gas.

8. Determining the Ideal Gas Constant What you will accomplish in this experiment You'll experimentally determine the value of the Ideal Gas Constant by measuring the pressure, volume, and temperature of a known number of moles of gas. You'll substitute these measurements into the Ideal Gas Law to solve for R , the Ideal Gas Constant.
