The constraints of this question is related to a programming problem, but I must get the math right in order for it to be applied to code. The actual problem is I need a function that evaluates to log base 10 but all I have at my disposal is addition, subtraction, multiplication, division, a powering function, and a natural log function.

Nuclear terrorism refers to any person or persons who detonate a nuclear weapon in an act of terrorism (meaning illegal or immoral use of violence for a political or religious cause). Some definitions of nuclear terrorism include the sabotage of a nuclear facility and/or the detonation of a radiological device, colloquially termed a dirty bomb, but consensus is lacking.

While each leap of progress requires its own intelligence, work, and courage, many of them are the result of a distinct, repeatable pattern. The THINK app and THINK film outline an approach to making the world work better.

### **IBM THINK App**

A statement, hypothesis, or theory has falsifiability (or is falsifiable) if it is contradicted by a basic statement, which, in an eventual successful or failed falsification, must respectively correspond to a true or hypothetical observation. For example, the claim "all swans are white and have always been white" is falsifiable since it is contradicted by this basic statement: "In 1697 ...
