H. Developing Information System Solutions: Getting Started. The problem-solving and systems development fundamentals introduced in this chapter should help you propose information system solutions for simple real world business problems. First, use the solution methodology discussed in Section I.

Solving Business Problems with Information Systems

"[Management information systems is] the study of computers and computing in a business environment. Computer science focuses on the machine while information systems, or management information systems, focuses on how IT can support the strategy and operation of organizations," she explains.

The Role of Management Information Systems | Smartsheet

The Master of Science in Information Systems (MSIS) program focuses on training students in the core concepts of computing and business so graduates can develop successful careers in management positions that require deep technical skills.

MS in Information Systems | NYU Computer Science

"Helix Systems has afforded me the opportunity to expand my IT role to focus more on the business side. They take the time to really learn about the business as well as to research and present solutions." - Joe Cucchiara | Director of I.T.
