Totally_clueless said.... There is also the story of rice on the chessboard that you could use to motivate the discussion: A king offers a reward to a person, who, instead of a pot of gold, asks for one grain of rice for the first square of the chessboard, and double the previous number of grains on any subsequent square.

The tendency of the rate of profit to fall (TRPF) is a hypothesis in economics and political economy, most famously expounded by Karl Marx in chapter 13 of Capital, Volume III. Economists as diverse as Adam Smith, John Stuart Mill, David Ricardo and Stanley Jevons referred explicitly to the TRPF as an empirical phenomenon that demanded further theoretical explanation, yet they each differed as ...

Mechanic and Electrician Superconductivity. Authors: George Rajna Comments: 25 Pages. In strongly correlated materials such as cuprate high-temperature superconductors, superconductivity can be controlled either by changing the number of electrons or by changing the kinetic energy, or transfer energy, of electrons in the system. Comprehensive NCLEX Questions Most Like The NCLEX

Since the quantity demanded decreases when the price increases, this ratio is negative; however, the absolute value usually is taken and Ed is reported as a positive number. Because the calculation uses proportionate changes, the result is a unitless number and does not depend on the units in which the price and quantity are expressed.

Sometimes I get interesting questions that don't quite fit into any of the existing topics already discussed within the blog and my obsessive/compulsive nature tells me that getting this questions in a random part/page/post of the blog doesn't look quite neat either. Therefore I open this new page for all those questions you have! I...
