An Introduction to Mechanics: Amazon.co.uk: Daniel ...

With reference to the sketch, the height is $A \cos \theta$, so the frontal area is $AB \cos \theta$. The depth is $C \sin \theta$, so the volume V is $V = (AB \cos \theta)(C \sin \theta) = (A \cos \theta)(BC \sin \theta) = A(B \cdot C) \sin \theta \cos \theta$. The same approach can be used starting with a different face. $V = C(A \cdot B) \sin \theta \cos \theta = B(C \cdot A) \sin \theta \cos \theta$. Note that A, B, C are arbitrary vectors.

Solutions Manual to accompany AN INTRODUCTION TO MECHANICS

For 40 years, Kleppner and Kolenkow's classic text has introduced students to the principles of mechanics. Now brought up to date, this revised and improved second edition is ideal for classical mechanics courses for first- and second-year undergraduates with foundation skills in mathematics.
