and then apply a statistical inference technique called hypothesis testing. First, we describe the hypothesis tests for one-population mean. The results from this exercise will translate to other hypothesis-test analogies of the one-sample z-interval and one-sample t-interval confidence-interval procedures, respectively.

In this section, we describe the complete procedure of hypothesis testing when the sample size  $n \geq 30$ . Example 1: Suppose that an automobile manufacturer advertises that its new hybrid car has a mean gas mileage of 50 miles per gallon. You take a simple random sample of  $n = 30$  hybrid vehicles and test their gas mileage.
