Vaccination flow chart. Pupils have to cut & stick the statements onto the correct part of the flow chart and then draw diagrams to represent what is happening. Good to use as support at KS3 or KS4.

### Vaccination flow chart by cathb1975 | Teaching Resources

How vaccines work. Vaccines work by making us produce antibodies to fight disease without actually infecting us with the disease. If the vaccinated person then comes into contact with the disease itself, their immune system will recognise it and immediately produce the antibodies they need to fight it.

### How vaccines work - NHS

Vaccines are like a training course for the immune system. They prepare the body to fight disease without exposing it to disease symptoms. When foreign invaders such as bacteria or viruses enter the body, immune cells called lymphocytes respond by producing antibodies, which are protein molecules.

### **How Do Vaccines Work? - Live Science**

How your immune system works. The mucus tries to flush out the virus and stop more of it from entering the body. Next, your immune response can send white blood cells to surround the virus to prevent more harm. Lastly, it can produce special cells called antibodies. Antibodies can lock onto and destroy the virus.
