Adv Biology: DNA and RNA Study Guide • Chapter 12 • Vocabulary -Notes • What experiments led up to the discovery of DNA being the hereditary material? o The discovery that DNA is the genetic code involved many experiments. Experiments by Griffith, Avery, Hershey and Chase, Watson and Crick.

### DNA and RNA Study Guide Adv

DNA Replication. DNA replication is the first step in both mitosis and meiosis. This process requires that a cell unwind the length of an entire chromosome in segments to be copied. These copies must be exact; without any errors. The process will end with an exact copy of one chromosome's DNA. Several enzymes are necessary for DNA replication ...
