Name What Is Ecology? Lesson Objectives Describe the study of ecology. Class Date Explain how biotic and abiotic factors influence an ecosystem.

dmjdodd.weebly.com

A main concept in landscape ecology is scale. Scale represents the real world as translated onto a map, relating distance on a map image and the corresponding distance on earth. Scale is also the spatial or temporal measure of an object or a process, or amount of spatial resolution. Components of scale include composition, structure, and function, which are all important ecological concepts.

Landscape ecology - Wikipedia

Environmental science is an interdisciplinary academic field that integrates physical, biological and information sciences (including ecology, biology, physics, chemistry, zoology, mineralogy, oceanology, limnology, soil science, geology, atmospheric science, and geodesy) to the study of the environment, and the solution of environmental problems.

Environmental Science - Laura Banks

Within each biome there are intricate patterns of how the flow of matter (energy) takes place. There are food chains, food webs and various types of ecological pyramids used to demonstrate this process.

The following was originally written for The Conversation, and republished in The San Francisco Chronicle. I'm re-posting here. Plastic pollution in the world's oceans has become a global environmental crisis. Many people have seen images that seem to capture it, such as beaches carpeted with plastic trash or a seahorse gripping a cotton swab with its tail.
