Improve your math knowledge with free questions in "Point-slope form: graph an equation" and thousands of other math skills.

**IXL - Point-slope form: graph an equation (Algebra 1 practice)**

3. slope 3; 4, 2 4. slope 1; 6, 1 Write an equation in slope-intercept form for the line with the given slope that contains the given point.

**Practice B LESSON Point-Slope Form - ASB Bangna**

First, you should plug the given points, (5, -8) (-2, 6), into the slope formula to find the slope of the line. Then, plug the slope into the slope formula,  $y = mx + b$ , where  $m$  is the slope.  $y = -2x + b$ . Plug in either one of the given points, (5, -8) or (-2, 6), into the equation to find the  $y$ -intercept ( $b$ ).

How to Solve for Slope in Algebra 1. Negative slope refers to a line that goes down as you move left to right. Understand and memorize the definition, or formula, of slope. When given two points with coordinates, the formula for the slope of the line containing those two points is  $m = (y_2 - y_1) / (x_2 - x_1)$ .

**How to Solve for Slope in Algebra 1 | Sciencing**

Algebra 1 B Point Slope The equation is useful when we know: one point on the line:  $(x_1, y_1)$ ; and the slope of the line:  $m$ ; and want to find other points on the line.

Improve your math knowledge with free questions in "Point-slope form: write an equation" and thousands of other math skills.

**IXL - Point-slope form: write an equation (Algebra 1 practice)**

Remember that slope is rise over run, or  $y/x$ . Therefore the slope of this line is 2. You could have used any triangle to figure out the slope and you would still get the same answer. Putting it all together, our point is  $(-1, 0)$  and our slope is 2.

**Point Slope Form - Free Math Help**

$(x_1, y_1)$  is a known point  $m$  is the slope of the line  $(x, y)$  is any other point on the line.

Intro to point-slope form. Point-slope is the general form  $y-y_1=m(x-x_1)$  for linear equations. It emphasizes the slope of the line and a point on the line (that is not the y-intercept). Watch this video to learn more about it and see some examples. Created by Sal Khan.

### **Intro to point-slope form | Algebra (video) | Khan Academy**

In this lesson, students learn to write the equation of a line given a point on the line and the slope of the line, by using the point-slope formula, which states that given a point  $(x_1, y_1)$  and a ...
