"Introduction" to Probability and Statistics. Don't you believe it. This book is not for those who have not had any exposure to probability and statistics. Like a lot of upper division mathematical textbooks it is written in almost pure "Mathenese" with a lot of implied teaching and assumptions that you already know the basics.

Probability. But since there are 6 ways to get 2 heads, in four flips the probability of two heads is greater than that of any other result. We express probability as a number between 0 and 1. A probability of zero is a result which cannot ever occur: the probability of getting five heads in four flips is zero.
