Immunity Answer Key

You have just gotten a splinter in your hand. Explain what happens during the inflammatory and wound-healing response that occurs. When the splinter penetrates the skin, phagocytes will travel to the site to engulf any dead cells and bacteria present.

The Immune System Answer Key - HelpTeaching.com

a biological preparation that improves immunity to a particular disease, typically contains an agent that resembles a disease-causing microorganism, and is often made from weakened or killed forms of the microbe, its toxins or one of its surface proteins. The agent stimulates the body's immune system to recognize the agent as foreign, destroy it, and "remember" it, so that the immune system ...
