15.2 Recombinant DNA. Lesson Summary. Copying DNA Genetic engineers can transfer a gene from one organism to another to achieve a goal, but first, individual genes must be identified and separated from DNA. The original method (used by Douglas Prasher) involved several steps: Determine the amino acid sequence in a protein.

### **Name**

What is genetic engineering? Genetic engineering is making changes in the DNA code of a living organism. 2. Is the following sentence true or false? Making changes to the DNA code is similar to changing the code of a computer program. 3. Scientists use their knowledge of the of DNA and its properties to study and change DNA molecules. 4.
