A chemical substance is a form of matter having constant chemical composition and characteristic properties. A chemical substance cannot be separated into its constituent elements by physical separation methods, i.e., without breaking chemical bonds. Chemical substances can be simple substances, chemical compounds, or alloys. Chemical elements may or may not be included in the definition ...

General Finishes Milk Paint is a premium interior/exterior mineral based paint named for its low-luster sheen, which mimics the look of old-world furniture paint. It is not a powdered, casein-based milk paint, but a premixed modern version that is so durable it does not require a topcoat unless you want to increase the sheen.
