Blood Type Punnett Square Practice There are four major blood groups determined by the presence or absence of two antigens (proteins) – A and B – on the surface of red blood cells:

Blood Type Punnett Square Practice - Weebly

Learn how to set up and solve a genetic problem involving multiple alleles using ABO blood types as an example! This video has a handout here: <http://www.amo...>

Multiple Alleles (ABO Blood Types) and Punnett Squares

Community Answer. Since type O is recessive (hidden) and type B is dominant, the baby most likely has type B blood, unless the parent with type B blood also has an allele (form of a gene) for O blood (BO in the Punnett Square). If this is the case, there is the possibility that the baby has type O blood.

How to Determine Your Baby's Blood Type Using a Punnett Square
