TED Talk Subtitles and Transcript: As machines take on more jobs, many find themselves out of work or with raises indefinitely postponed. Is this the end of growth? No, says Erik Brynjolfsson -- it's simply the growing pains of a radically reorganized economy. A riveting case for why big innovations are ahead of us ... if we think of computers as our teammates.

There are hundreds of cytokines & growth factors, each with a specific message (e.g. "hey fibroblasts, let's make some more collagen"). Multiple messages are in play at any time in an MSC mediated response.

### **Growth Factors in Skin Care - Series Introduction ...**

A guiding principle in cancer research is that tumor initiation and progression result from the sequential acquisition of genetic mutations that contribute to subsequent clonal expansions (Nowell, 1976). This view is strongly supported by early studies where genetic mutations were analyzed across different stages of colorectal cancer (Vogelstein et al., 1988).

Perfusion is not exactly new for cell culture (Croughan et al., 2015). From the early 90s to today, different commercial molecules such as recombinant follicle stimulating hormone (Gonal-f®), interferon beta-1a (Rebif®) and factor-VIII (Kogenate-FS®) were launched using perfusion processes (Pollock et al., 2013). Most of these molecules are labile and their indication range is expressed in ...

Cellular differentiation is the process where a cell changes from one cell type to another. Usually, the cell changes to a more specialized type. Differentiation occurs numerous times during the development of a multicellular organism as it changes from a simple zygote to a complex system of tissues and cell types. Differentiation continues in adulthood as adult stem cells divide and create ...
