You will find a glossary, a timeline, context-setting activities, a bibliography, curriculum links and curriculum-supporting field trip suggestions. The

Human Impact on Ecosystems - thehenryford.org

The experiments carried out in Biosphere 2 were designed to study the relationship between living things and their environment and to see whether humans might be able to live in space one day. The mission was supposed to last 100 years, with two teams of scientists spending 50 years each in the facility.

biosphere | National Geographic Society

Human activity adds nitrogen to the biosphere in the form of nitrate (a major component in plant fertilizers) Although nitrogen gas is abundant only certain types of bacteria that live in soil and on roots of plants can use this form directly. They convert nitrogen gas to ammonia through nitrogen fixation.
