Africa: a biography of the continent. Out of Africa, the world's most ancient and stable landmass, Homo sapiens dispersed across the globe. And yet the continent that gave birth to human history has long been woefully misunderstood and mistreated by the rest of the world. In a book as splendid in its wealth of information as it is breathtaking in...

### **Africa: a biography of the continent - John Reader ...**

As a "biography" of the continent, this book presents Africa as a dynamic and exceptionally fecund entity, where the evolution of humanity is merely one of many developmental trajectories that are uniquely evident there. In balder language, Africa weaves human history into what is known about Africa's geology, geography, and biological history.

Out of Africa is a 1985 American epic romantic drama film directed and produced by Sydney Pollack, and starring Robert Redford and Meryl Streep. The film is based loosely on the

autobiographical book *Out of Africa* written by Isak Dinesen (the pseudonym of Danish author Karen Blixen), which was published in 1937, with additional material from Dinesen's book *Shadows on the Grass* and other sources.

### **Out of Africa (film) - Wikipedia**

When it appeared in 1985, USA for Africa's "We Are the World" was viewed as '80s pop stars finally gaining a social conscience. Although it eventually became so overplayed that many radio stations never spun it anymore as the decade closed, "We Are the World" was produced with the best of intentions.

### **South African - Biography**

Paradoxically, the coastline of Africa—18,950 miles (30,500 km) in length—is shorter than that of Europe, because there are few inlets and few large bays or gulfs. Off the coasts of Africa a number of islands are associated with the continent. Of these Madagascar, one of the largest islands in the world, is the most significant.
