Log usage of forms and reports. This utility lets you track who opens each form and report in your database, and when. Logging gives feedback on how people use your application, and may help diagnose crashes or corruptions.

### **Microsoft Access tips: Log usage of reports or forms**

This webinar is a recording of the live event of September 28, 2005. It includes a quick overview of the types of knowledge you organize in CaseMap; a review of CaseMap and TimeMap work product (easy to produce and sure to impress clients); and a quick look at an example medical case that's been organized in CaseMap.

### **CaseSoft | Case Analysis Made Easy - CaseMap Suite**

One nuance of C++ that is often missed or misunderstood is that access control works on a per-class basis, not a per-object basis. This means that when a function has access to the private members of a class, it can access the private members of any object of that class type that it can

see.. In the above example, copyFrom() is a member of DateClass, which gives it access to the private ...

An amazing tut - I have to make my own covers as I am left handed and most covers are right handed - of course.....lol I inner lined my latest slip case with plastic packaging - the kind that is in a sheet form and usually wrapped round an item (bubble wrap is too noisy and then too thin!) to give the phone some protection - and used velcro to fasten but half the time I forget to fasten so the ...

### **My 3 Monsters: DIY iPhone Wallet Tutorial**

Multi-objective formulations are realistic models for many complex engineering optimization problems. In many real-life problems, objectives under consideration conflict with each other, and optimizing a particular solution with respect to a single objective can result in unacceptable results with respect to the other objectives.

### **Multi-objective optimization using genetic algorithms: A ...**

Starting from a  $(x=5)$ , the solver in two iterations goes to 10 .The careful reader will note that this is a linear problem and one linear solve should be enough to get the optimal value. The default configuration of the solver is aimed at non-linear problems, and for reasons of simplicity we did not change it in this example.

### **Non-linear Least Squares — Ceres Solver**

Martin Green's Access Tips. I've been teaching Microsoft Access since 1995. Even then Access 2, Microsoft's first commercially available version, was a great database program and it has got better with every release.

### **Martin Green's Access Tips - Fontstuff Ltd.**

The visibility of an entity with block scope extends until the end of the block, including inner blocks. Nevertheless, an inner block, because it is a different block, can re-utilize a name existing in an outer scope to refer to a different entity; in this case, the name will refer to a different entity only within the inner block, hiding the entity it names outside.

### **Name visibility - C++ Tutorials**

1.2. Reading a CSV file ¶. Unfortunately, it is rare to have just a few data points that you do not mind typing in at the prompt. It is much more common to have a lot of data points with complicated relationships.

### **1. Input — R Tutorial - Cyclismo**

1. Introduction F\* is a verification-oriented programming language developed at Microsoft Research, MSR-Inria, and Inria.It follows in the tradition of the ML family of languages in that it is a typed, strict, functional programming language. However, its type system is significantly richer than ML 's, allowing functional correctness specifications to be stated and checked semi-automatically.

### **F\* Tutorial**

The latest gensim release of 0.10.3 has a new class named Doc2Vec. All credit for this class, which is an implementation of Quoc Le & Tomáš Mikolov: Distributed Representations of Sentences and Documents, as well as for this tutorial, goes to the illustrious Tim Emerick.
