A system of accounting that recognizes revenue and matches it with the expenses that generated that revenue. Unlike other systems of accounting, which recognize revenue and expenses in the order in which they are received, the accrual accounting convention ignores the function of time and only considers what expenses generate what revenues, even if payments have not actually been made.

Accrual accounting financial definition of accrual accounting

Accounting or accountancy is the measurement, processing, and communication of financial information about economic entities such as businesses and corporations. The modern field was established by the Italian mathematician Luca Pacioli in 1494. Accounting, which has been called the "language of business", measures the results of an organization's economic activities and conveys this ...
