and linear programming (a clean and intuitive treatment of the simplex algorithm, duality, and reductions to the basic problem). The nal Part IV is about ways of dealing with hard problems: NP-completeness, various heuristics, as well as quantum algorithms, perhaps the most advanced and modern topic.

source strongly connected component. This can be determined in linear time: run the SCC algorithm, construct the metagraph, use the source-finding algorithm from an earlier homework to return all sources, and check if there is only one source. The only step that needs further clarification is the construction of the metagraph. The SCC algorithm
