Adrian Bejan - Constructal Law. The constructal law accounts for the arrow of time t , which is the direction of the evolution of flow organization over time. The Benjamin Franklin Medal (2018) was awarded to Adrian Bejan for thermodynamics and "constructal theory, which predicts natural design and its evolution in engineering, scientific, and social systems."

I met Adrian Bejan at the Lions Cannes Festival in June, where I was also introduced to his Constructal law. Here's a very nicely done video of Adrian explaining his theory. Here's the law in Bejan's terms: "For a finite-size system to persist in time (to live), it must evolve in such a way...

Constructal theory provides a broad coverage of 'design' everywhere, from engineering to geophysics and biology [2]. To see the generality of the method, consider the following metaphor, which we use to teach in the introductory segment of the course.

Constructal theory is a jolt the other way, a means to rationalize macroscopic features, objective, and behavior." There are many more examples, all from physics, which is the establishment that is now starting to catch up with (and claim) the physics of evolution, life and design that morphs with freedom.

Dr. Adrian Bejan: How Cooling Laptops Led to Constructal Theory

Adrian Bejan. Emphasizing the ongoing evolution of design in nature over both short and long time scales, constructal theory points the way to engineering approaches consistent with those observed in the natural world and allows for more efficient and sustainable approaches to the design of electronics, heating systems, vehicles, traffic management,...

Adrian Bejan is a brilliant engineer and an invaluable asset to the scientific community. His theory on Constructal Law seeks to bridge the gap between the many long believed disparate fields of study. A must read for any physics/science enthusiasts, or those with a genuine interest in the underpinnings of reality.
