WORKPLACE LINK: Nancy works at a clothing store. A customer wants to know the original price of a pair of slacks that are now on sale for 40% off. The sale price is \$16.50. Nancy knows that 40% of the original

Algebra Word Problems - KET

The roots of algebra can be traced to the ancient Babylonians, who developed an advanced arithmetical system with which they were able to do calculations in an algorithmic fashion. The Babylonians developed formulas to calculate solutions for problems typically solved today by using linear equations, quadratic equations, and indeterminate linear equations.

Although quadratic equations are often used to find maximums and minimums for problems involving projectile motion, they can also be used to evaluate the path of a projectile at various time periods. For example, quadratic equations can be used to determine the height of a projectile at time "t" after the projectile has been released.
