The Scientific Method with the Simpsons KEY - 630s Science

The number of dependent variables in an experiment varies, but there can be more than one. Experiments also have controlled variables. Controlled variables are quantities that a scientist wants to remain constant, and she or he must observe them as carefully as the dependent

variables.

Variables in Your Science Fair Project

Types of Variables. Control variables are controlled to make sure that the independent variable is the only factor causing a change in the dependent variable. Plant growth is likely affected by fertilizer (making it dependent), but fertilizer application is not affected by plant growth (making it independent).

Identify the Controls and Variables - BIOLOGY JUNCTION

A variable in an experiment which is held constant in order to assess the relationship between

multiple variables, is a control variable. [1] [2] A control variable is an element that is not changed throughout an experiment, because its unchanging state allows the relationship between the other variables being tested to be better understood.
