This esheet accompanies the lesson, Skin as an Organ. Introduction. Did you know that skin is the largest body organ? In this activity, you'll examine the skin and how it functions as an organ and as part of a larger body system.

Skin as an Organ - Science NetLinks

What Is the Excretory System? Your body needs water to survive. If you went more than a couple of days without water, you would be very thirsty and your cells would not be able to keep functioning.

Excretory System Lesson for Kids - Study.com

The excretory system is a system of organs that removes waste products from the body. When cells in the body break down proteins (large molecules that are essential to the structure and functioning of all living cells), they produce wastes such as urea (a chemical compound of carbon, hydrogen, nitrogen, and oxygen).
