C++ (/ˌsɪːˌplʌsˈplʌs/) is a general-purpose programming language that was developed by Bjarne Stroustrup as an extension of the C language, or "C with Classes". It has imperative, object-oriented and generic programming features, while also providing facilities for low-level memory manipulation. It is almost always implemented as a compiled language, and many vendors provide ...

A railgun is a device that uses electromagnetic force to launch high velocity projectiles, by means of a sliding armature that is accelerated along a pair of conductive rails. It is typically constructed as a weapon, and the projectile normally does not contain explosives, instead relying on the projectile's high speed to inflict damage.

### **Railgun - Wikipedia**

Admissions & Financial Aid. Invest in yourself. No trust fund is required. Value and versatility are hallmarks of an SCC education. You can rise to the challenge of higher education here without the fear of falling into a mound of debt.

### **Request Information - St. Charles Community College**

One of the major goals of dlib is to have documentation that enables someone to easily make use of its various components. Ideally, you would read a short description of something, understand it immediately, and begin using it in your application without any difficulty.
