Testing Silver with 14k nitric Acid besteclectica. Thrill-Seeker Jul 1, 2012 4:08:40 AM. I 've been having some difficuolty testing silver, nothing new for me. I use 14k nitric acid after scraping as deep a spot as I can get without damaging the looks of the piece, usually on an edge somewhere. ...

Testing Silver with 14k nitric Acid - The eBay Community

Other coin professionals use weight as a test, or the silver "ring test," as silver has a distinctive sound when struck lightly by another metal. If you're not quite at an expert level for detecting fake vs. real silver, we carry a number of very good coin books on detecting counterfeits.

Silver Test Acid - Wizard Coin Supply

Then I used the stone as described in the kit directions and I was able to see clear flecks of red (the expected color for silver) in the drop of solution on the stone. A similar test with a modern quarter did not show any flecks of red - so it works if you follow the instructions exactly.

Silver Testing Kit Silver Acid Test Liquid with Stone ...

How to Identify Pure Silver. By Michael Batton Kaput. luxury silver tray with elegant silver tea pot image by araraadt from Fotolia.com. Because of the high value of pure precious metals, efforts to pass off substandard impostors as the real thing are common. Silver is no exception. Many vendors try to sell imitation silver at the price of the ...

How to Identify Pure Silver | LEAFtv

3) The Magnet Test Silver is not magnetic. If you place a strong, rare-earth magnet called a Neodymium magnet on a silver coin or bar, it should not easily stick to it. If you are testing bars, you can angle one at 45 degrees and let the magnet slide down. It should slide down very slowly. If it sticks or it slides very quickly, it is not silver.

3 ways to determine if silver is real | Survival Monkey Forums

This is another fairly common way to test the purity of your silver - although I do not recommend using this method alone. Silver is a non-ferrous material, meaning that it is not magnetic. For this test, the best tool to use is a rare-earth magnet which is also stronger than most magnets and won't lose strength over time.

How to test the purity of your antique silver | Testing ...

Gold testing kits are used to test the purity of the gold and the 'Karat'. Testing kits can either come in the form of acid testing -- the most popular form -- that can identify the Karat and purity of the gold through acid reactions, electronic testing kits and touchstone testing kits that compare the reaction of real gold to other forms of gold you may have.

How to Best Use Gold Test Kits | Sciencing

To test gold at home, check your gold for a hallmark, with "GF" or "HGP" meaning its gold plated, while "24K" or another number means its real gold. Alternatively, find out if your item is gold plated by holding the piece under a light to see if it's fading at the edges.
