The alias solution you posted is clever, but I would argue against its use in scripts, for the same reason I don't like using any aliases in scripts; it tends to harm readability.

### **A better way to check if a path exists or not in PowerShell**

While it's always good to have benchmarks to compare different ways of accomplishing something, let's not overlook the other conclusion that can be drawn here: unless you're having to discard values hundreds of thousands of times the performance differences are negligible. And if a millisecond here or there really matters to you, you probably shouldn't be using PowerShell in the first place.
