Becoming Human

In common usage, the word "human" generally refers to the only extant species of the genus Homo—anatomically and behaviorally modern Homo sapiens.. In scientific terms, the meanings of "hominid" and "hominin" have changed during the recent decades with advances in the discovery and study of the fossil ancestors of modern humans. The previously clear boundary between humans and apes has ...

Human - Wikipedia

The spindle assembly checkpoint modulates the timing of anaphase initiation in mitotic cells containing improperly aligned chromosomes and increases the probability of successful delivery of a euploid chromosome set to each daughter cell. *S. cerevisiae* BUB1 is a protein that is required for function of the spindle assembly checkpoint in budding yeast.

Fertilization occurs when a sperm and an oocyte (egg) combine and their nuclei fuse. Because each

of these reproductive cells is a haploid cell containing half of the genetic material needed to form a human being, their combination forms a diploid cell.
