A simulation is an approximate imitation of the operation of a process or system; the act of simulating first requires a model is developed. This model is a well-defined description of the simulated subject, and represents its key characteristics, such as its behaviour, functions and abstract or physical properties.

ICRIER started the Regional Insights initiative in 2008. The rationale is that research on India's relations with other countries will have to take on board the increasing demand being placed on India for a major role in international discussions on evolving a new global social, economic, financial and environmental architecture.
