Seen this puzzle on Facebook or Twitter? Annoyed that when you tell people you can find 40 squares they accuse you of being a troll because they can only see 24?? Feel free to link them here.

Square Puzzle Solution

Square-1. The Square-1 (previously called as Cube 21 and Back to Square One) is a shape-shifting three-layered twisty puzzle. Its solution is very unique because the kite-shaped corners and the triangular edges are indistinguishable to the puzzle's inner mechanism, meaning that corners can be swapped with edges and therefore it's possible to have 10 pieces in the upper layer while only 6 in the ...

Square-1 Cube Puzzle - An overview and Beginner's Solution

Answer with solution. As all the sides are either horizontal or vertical we can say squares diagonals should be parallel. Now to see if the diagonals are parallel or not, i have drawn the diagonals where its not clear if it is a square or rectangle in the image below.
