The Scientific Method with the Simpsons KEY - 630s Science

Types of Variables. Control variables are controlled to make sure that the independent variable is the only factor causing a change in the dependent variable. Plant growth is likely affected by fertilizer (making it dependent), but fertilizer application is not affected by plant growth (making it independent).

Identifying & Interpreting Independent & Dependent Variables

The number of dependent variables in an experiment varies, but there can be more than one. Experiments also have controlled variables. Controlled variables are quantities that a scientist

wants to remain constant, and she or he must observe them as carefully as the dependent variables.
