Two designers may use entirely different designs to achieve the same creation, just as two artists may use different subjects to achieve the same concept. Computer security is also a science. Its theory is based on mathematical constructions, analyses, and proofs.

Introduction to - iips.icci.edu.iq

For computer-security courses that are taught at the undergraduate level and that have as their sole prerequisites an introductory computer science sequence (e.g., CS 1/CS 2). Instead it looks at the systems, technology, management, and policy side of security, and offers students fundamental security concepts and a working knowledge of threats and countermeasures with “just-enough” background in computer science. The result is a presentation of the material that is accessible to students of all levels.
