Book solution "An Introduction to Game Theory", Martin J ...

1 Introduction. 5.3 Altruistic preferences. Person 1 is indifferent between (1,4) and (3,0), and prefers both of these to (2,1). The payoff function u defined by $u(x,y) = x + \frac{1}{2}y$, where x is person 1's income and y is person 2's, represents person 1's preferences. Any function that is an increasing function of u also represents her preferences.

An Introduction to Game Theory - Martin J. Osborne ...

The subject matter of game theory is exactly those interactions within a group of individuals (or

governments, firms, etc.) where the actions of each individual have an effect on the outcome that is of interest to all. Yet, this is not enough for a situation to be a proper subject of game theory: the Game theory studies strategic

An Introduction to Game Theory - Koç Hastanesi

An Introduction to Game Theory (0th Edition) View more editions. For outcome (2, 1) the utility person 1 gets is calculated below: For outcome (3, 0) the utility person 1 gets is calculated below: Hence, on the basis of above payoff function, person 1 prefers outcome (1, 4) and (3, 0) over (2, 1). This is because the former two options give him higher payoff than the latter.
