Regular expressions are quite complex to manage due to the fact that some characters are reserved: for example, "foo.bar".replaceAll(".") produces an empty string, because the dot means "anything" If you want to replace only the point should be indicated as a parameter "\\.". A simpler solution is to use StringBuilder objects to search and replace text.

How to replace case-insensitive literal substrings in Java

Astral Plane. A silvery void that connects the Material and Inner Planes to the Outer Planes, the astral plane is the medium through which the souls of the departed travel to the afterlife. A traveler in the Astral Plane sees the plane as a vast empty void periodically dotted with tiny motes of physical reality calved off of the countless planes it overlaps.
