Component A is moving along the column faster than Component B, which is moving faster than Component C. Liquid chromatography (LC) is a technique often used by analytical chemists to

Interpreting Graphics - Mrs. Henderson

Best Answer: This is a determination of the specific heat of an unknown metal using a calorimeter (a container which doesn't lose or gain heat from outside of itself. Actually styrofoam cups work very well for this) and water. The metal is weighed and heated and then put into the calorimeter with a weighed amount of water at a certain temperature.
