Inertia And Mass Answers

The enormous mass of the bull moose is extremely intimidating. Yet, if Ben makes a zigzag pattern through the woods, he will be able to use the large mass of the moose to his own advantage. Explain this in terms of inertia and Newton's first law of motion.

Inertia and Mass - physicsclassroom.com

I'm not a physicist but I think mass and inertia are not the same thing. They are obviously related but they are different entities. Mass is the measure of the amount of matter an object has and inertia is the resistance an object "makes" to changes in its motion state (if an object is at rest or moving with constant speed, it'll stay that way unless a force is applied to it).

inertia is the laziness of an object, or an objects resistance to change its state of motion, or how easy it is to start or stop an object. Mass is the measure of an object's inertia.

Inertia is to mass - answers.com

Answer: The BAAD covered with tape has more mass because it includes both the mass of the BAAD plus the mass of the tape. 3. What is the relationship between mass and inertia? Answer: The greater an object's mass, the greater its inertia. 4. Which has more inertia: the regular BAAD or the one that's covered with tape?

Inertia and Mass - physicsclassroom.com

Mass and inertia are synonymous. You cannot refer to one without the other being considered. Mass is calculated by using an objects inertia. Since inertia is a quality of matter that resists motion, we can apply an increasing force to an object until it accelerates.

What is the relation between mass and inertia? - Quora

INERTIA AND MASS What a strange word! How do you even pronounce it? Like this: "in-NER-sha." The word "inertia" comes from the Latin word "inert," which means "lazy." If you've studied chemistry a bit, you may have come across this word when you learned about the noble gases (such as helium and neon).

Explain your answer. Objects on the spaceship would still have mass and be able to exhibit the same degree of inertia as they exhibit on Earth. While their weight (a gravity thing) will be significantly diminished, their mass and tendency to resist a disruption from their state of motion will be just the same as on Earth. 5.
