Not just a memory technique, repeating and reinforcing information you want to retain in long-term memory is a necessity. Practice, practice, practice is the best way to solidify data you need to keep in your memory and retrieve when needed.

Memory Is Repetition and Reinforcement - Memorise
Burrhus Frederic Skinner (March 20, 1904 – August 18, 1990), commonly known as B. F. Skinner, was an American psychologist, behaviorist, author, inventor, and social philosopher. He was the Edgar Pierce Professor of Psychology at Harvard University from 1958 until his retirement in 1974.. Skinner considered free will an illusion and human action dependent on consequences of previous actions.

Animals rely on learned associations to make decisions. Associations can be based on relationships between object features (e.g., the three leaflets of poison ivy leaves) and outcomes (e.g., rash ...

Hippocampal pattern separation supports reinforcement learning | Nature Communications
Deep neural networks that learn to represent data in multiple layers of increasing abstraction have dramatically improved the state-of-the-art for speech recognition, object recognition, object detection, predicting the activity of drug molecules, and many other tasks. Deep learning discovers intricate structure in large datasets by building distributed representations, either via supervised ...
