Internet Amp World Wide Web

The World Wide Web. The Web is just another avenue for transmitting data over the Internet, in this case by entering a string of characters called a uniform resource locator (URL) into a browser. This URL describes the location of a document written in HyperText Markup Language (HTML), full of the links and silly cat GIFs you know...

The Internet and the World Wide Web Are Not the Same Thing

The world wide web, or WWW, was first created as a method to navigate the now extensive system of connected computers. It was designed by Tim Berners-Lee through a rudimentary hypertext program called Enquire. The WWW is what most people think of as the internet. But as a matter of fact, the internet is the underlying network connection that ...

The Evolution of the World Wide Web | iTmunch

Thirty years ago, the World Wide Web was born. But over the next 30 years, it needs to be "changed for the better," according to its inventor Tim Berners-Lee.
