Hex Enduction Hour is the fourth studio album by the English post-punk band the Fall.Released on 8 March 1982, it builds on the low fidelity production values and caustic lyrical content of their earlier recordings, and features a two-drummer lineup. Frontman Mark E. Smith establishes an abrasive Northern aesthetic built in part from the 20th century literary traditions of kitchen sink realism ...

@Vitim.us: << is the bitwise left shift operator. Assuming g is a non-zero integer, g << 8 therefore effectively multiplies g by 256, adding to zeroes to the end of its hex representation. Likewise r << 16 adds 4 zeroes. Adding 1 << 24 (1000000 in hex) ensures that the hex representation is left-padded with any required zeroes once the leading 1 is stripped off using slice().

Earlier this week, we had a discussion on how to increase the speed and efficiency of your network through a couple of added registry values. As discussed before, there's no practical reason to use a program that promises to speed up your Internet connection. While some applications actually work, most of them just occupy resources in your computer and suck your bank account dry without any ...

I've been looking for a simple Java algorithm to generate a pseudo-random alpha-numeric string. In my situation it would be used as a unique session/key identifier that would "likely" be unique over 500K+ generation (my needs don't really require anything much more sophisticated).. Ideally, I would be able to specify a length depending on my uniqueness needs.

What's on this page? I'm interested in producing complexity out of simple parts. This page contains bookmarks that Icollected while working on games since 1990; I did not write most of the content linked from here. As a result the set of links here reflects the types of things I needed to know: only a few specific topics (not everything related to game programming), general ideas instead ...
